Subject: Inspections w/ BSEE

Sharon,

I highly encourage you to visit with the Safety, Health and Environmental Management Program (SHEMP) and receive clearance for you to represent the agency in the field. Last week I was not cleared for the Gold King Mine spill because of a minor oversight with my medical monitoring. Fortunately, the Regional Response Center requested that I work with them during the Gold King Mine spill. I know you have sent multiple emails to the SHEMP, but it may help if you visit her desk. It would be unfortunate for you to complete the BSEE required training, spend weeks coordinating with BSEE, and at the last minute for you to not be able to attend the offshore inspections. Below are some topics to discuss with the SHEMP:

- ☐ Job Hazard Analysis (JHA) – Add your name to the Offshore JHA
- ☐ Medical Monitoring – Inquire if you need to be placed on Medical Monitoring
- ☐ Training – Inquire if there are any additional required trainings

If the SHEMP would like to discuss the Health and Safety Plan (HASP), I will put together the HASP a week before we travel.

Robert Houston
